EDUCATION

San Jose State University

San Jose, CA

B.S. Information and Data Analytics

Sep 2021 – May 2025

- Summa Cum Laude (GPA: 3.98)
- Coursework: Operating Systems Concepts, User-Centered Interface Architecture, Information Architecture, Information Security

PROJECTS

Home Lab Game Server

October 2025

LinuxGSM, Cubecoders AMP

- Built and configured a server using repurposed hardware to host multiplayer game services.
- Deployed and managed a Linux-based server environment using LinuxGSM, later migrating to Cubecoders AMP for a better interface for monitoring and administration.
- Performed system updates, automated backups, configuration management, and performance tuning.
- Diagnosed and resolved network connectivity issues across multiple users to improve reliability and performance.

Discord Bot Development & Server Deployment

August 2025

Java, Maven, Discord API, Linux

- Configured and deployed a Discord music bot (JMusicBot) to provide real-time audio streaming functionality.
- Managed build life-cycle and project dependencies using Maven.
- Modified Bash configuration files to customize bot settings and improve server functionality.
- Accessed and managed the server remotely using SSH on a Raspberry Pi Linux environment.
- Deployed and maintained the bot on a Linux-based remote server using command-line tools.

TECHNICAL SKILLS

- Technical support and troubleshooting for Windows 7/8/10/11, macOS, Linux, iOS, and Android systems.
- Experience leveraging AI tools and large language models (LLMs) such as ChatGPT and Claude to support development, troubleshooting, documentation, and productivity workflows.
- Operating system installation, configuration, maintenance, and software deployment across multiple platforms.
- Networking concepts including TCP/IP, DNS, DHCP, UDP, VPN, and basic network troubleshooting.
- Virtualization using VMware and VirtualBox for lab environments and system testing.
- Microsoft Office Suite, Google Workspace, and productivity and collaboration tools.
- Command-line operations using Windows Command Prompt, PowerShell, and Linux terminal environments.
- PC hardware assembly, diagnostics, and troubleshooting including desktop, peripherals, printers, and network issues.

PROGRAMMING LANGUAGES & TECHNOLOGIES

- **Languages:** Python, TypeScript, JavaScript, Java
- **Databases:** PostgreSQL, MongoDB, Firebase, MySQL
- **Cloud & Infrastructure:** AWS, Google Cloud Platform, Microsoft Azure, Cloudflare, Active Directory
- **Development Tools:** Git, GitHub, Node.js, REST APIs
